

ACKNOWLEDGEMENTS

At this place I would like to thank all those who made my studies at the *Ruprecht-Karl-Universität* Heidelberg to an unforgettable experience. It was there that the foundations for this publication were laid. Thanks go to Dr. J. Quakernaat (Apeldoorn) for kindly supplying the “German connection”. To my parents a very special word of thanks; my father constructed an endless array of electromechanical and electronic equipment at my request. His help was invaluable. To Manfred Gastner (Heidelberg), whose ingenious gadgets were always a great joy. To Dr. Dr. F. W. Pauli, who knew it all, but had to leave. To Dr. Sambasiva Rao Patchineelam (Rio de Janeiro, but formerly Heidelberg) for his help in so many ways. Thanks also to Prof. Dr. C. H. Oppenheimer (Austin, Texas), who nearly made it to Heidelberg. To Dr. H. J. McCunn (Houston, Texas) for a longstanding correspondence. To all those at the *Afdeling Bodemkunde en Geologie, Landbouwhogeschool Wageningen*, who kindly supplied so much hospitality; in particular Dr. Ir. R. Brinkman and Drs. E. L. Meijer. The experiments at Wageningen were made possible through the kind co-operation of Prof. Dr. J. D. De Jong and Prof. Dr. L. Van der Plas. In later years help came especially from those working at the *Laboratorium voor Materiaalkunde, Technische Hogeschool Eindhoven*; special thanks go to Drs. J. J. Hardon for his never-ending generosity and Mr. A. W. B. Theuws, for so many things made. Very special thanks to Piet van Etten, who helped out in all matters concerning computers, digitalization, scanning, CD-making, web page hosting et cetera. Only through his help the present digital version of the planned book has been made possible. Prof. Dr. B. H. Purser (Paris) and Prof. Dr. P. Möller (Potsdam) are kindly acknowledged for their help in bibliographical matters.
